The string.Format command is

1

```
string path = @"C:\Program Files\Microsoft Office\Office12\Word\Word.exe";
string args = string.Format(" /q {0} /f {1}", path, "document.doc");
Process.Start(path, args);

Deletion

The path contains spaces, so

On second reading, it's worse: arguments in that string. (Or do you think you are correct, you'd have to do this yesterday)
